

Ángel Luis Lara Martín

Computer Engineer | Generative AI, Software & Cloud

Madrid, Spain | +34 662 22 16 16 | angelluislara@hotmail.es | [linkedin.com/in/angellm](https://www.linkedin.com/in/angellm) | github.com/aangell98

PROFILE

Computer Engineer specialized in Generative AI, software development and cloud. Experience at Microsoft designing Azure solutions and developing AI concepts for enterprise customers, from technical definition to customer-facing demos. Hands-on experience with Python, RAG, AI agents, Azure OpenAI, Docker and CI/CD.

EXPERIENCE

Cloud & AI Solution Engineer, Microsoft

Jan 2026 - Sep 2026

- Designed and optimized scalable Azure cloud architectures, balancing performance, reliability and cost efficiency for enterprise customers.
- Took two AI concepts from technical ideation to commercialization for IBEX 35 enterprise customers, defining the technical approach and building customer-facing demos from scratch.
- Developed and presented AI solutions and technical demos to customers and senior stakeholders, translating emerging GenAI capabilities into concrete business use cases.
- Supported cloud adoption and application modernization initiatives, helping enterprise customers evaluate and accelerate their transition to Azure.
- Collaborated with account teams and cross-functional stakeholders to translate customer requirements into scalable technical solutions.
- Received a formal letter of recommendation from Microsoft following my tenure as Cloud & AI Solution Engineer.

Cybersecurity Technician, Tata Consultancy Services (Roche Farma project)

June 2022 - August 2022

- Managed server permissions, user privileges and access auditing across enterprise environments.
- Reviewed security certificates and supported compliance with corporate security protocols.

Global Operations Center Technician, Tata Consultancy Services (Roche Farma project)

March 2022 - June 2022

- Diagnosed infrastructure incidents and supported international customers end to end.

RESEARCH & PROJECTS

Entangle | Research Project / Bachelor's Thesis

2025 - 2026

First author | Accepted and presented at QCE 2026 | Published on arXiv

[GitHub](#) | [arXiv](#)

- Built Entangle, an open-source observatory with a six-phase GitHub GraphQL pipeline seeded by 71 quantum keywords, a collaboration graph, 2D dashboard, 3D visualization and conversational agent.
- Implemented the configurable six-worker conversational system with RAG over ~11,000 vector-store fragments; achieved 96.7% routing accuracy.
- The paper analyzes a June 2026 snapshot of 1,500+ repositories, 27,000 contributors and 400 organizations; it reports 2,387 cross-organization bridge contributors and a bus factor of 1 in 81.7% of analyzed repositories.
- Validated with 1,087 automated tests. The collaboration graph comprised 30,970 nodes, 101,190 edges and 752 communities (modularity 0.96). Stack: Python, FastAPI, React, Three.js, Azure OpenAI, Cosmos DB, NetworkX, Docker, GitHub Actions.

EDUCATION

BSc Computer Engineering, Information Systems, University of Castilla-La Mancha

2022 - 2026, Talavera de la Reina, Toledo

- Bachelor's Thesis: Entangle, mapping and analysis of the quantum computing ecosystem on GitHub. Grade: 9/10 (Outstanding).

Network Systems Administration Technician, IES Arcipreste de Hita

2020 - 2022, Azuqueca de Henares, Guadalajara

- Linux and Windows Server administration, Active Directory, networking and web services.

CERTIFICATIONS

[Microsoft Azure Fundamentals \(AZ-900\)](#)

[Microsoft Data Fundamentals \(DP-900\)](#)

[Microsoft AI Fundamentals \(AI-900\)](#)

SKILLS & TECHNOLOGIES

Cloud & AI: Azure, Azure OpenAI, AWS, RAG, AI Agents, LLMs, Cloud Architecture

Software: Python, FastAPI, JavaScript, React, Java, SQL

DevOps & Systems: Docker, GitHub Actions, CI/CD, Linux, Windows Server, Active Directory

LANGUAGES

Spanish (native), English (advanced, C1) | Class B driving license. Willingness to travel.
